Amazon has pledged to be Net zero carbon by 2040 with a path to achieving 100% renewable energy usage by 2025.

According to research undertaken by 451 Research, workloads operating on AWS infrastructure are dynamic allocation technologies and energy efficiencies built into AWS datacentre infrastructure,

The Terraform Foundation has been designed in accordance with the AWS Well Architected Framework, meaning that when you begin migrating workloads into your accounts, you will be inherently gaining AWS' work towards sustainability and assisting your organisation in achieving its sustainability goals.

Thoughtworks is a global technology consultancy that integrates strategy, design and engineering to drive digital innovation. We are over 11,500 Thoughtworkers strong across 51 offices in 18 countries. For 30 years, we've delivered extraordinary impact together with our clients by helping them solve complex business problems with technology as the differentiator.
